Capacities of these numerous truck models vary from 3,000 to 33,000 lbs. All trucks are manufactured in an ISO 9001 certified facility.

Doosan Infracore America is the fastest emerging forklift and lift truck company in the North American marketplace, thanks to its exceptional level of product performance and their persistently high level of customer support and service given to all Doosan Infracore Lift Truck users. The U.S. lift Truck division stationed in Cleveland has a skilled team experienced in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's original domestic lift truck marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled lift trucks as part of a national equipment expansion venture. Initial product sales of this manufacturing equipment focused on large business communities, the armed forces and on state-run companies. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to service and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical instruction grew to become the new focus for improving quality and product development.

Domestic lift truck trade for Daewoo started in 1967 and grew to an astonishing 90% market share in Korea. By the 1980's, Daewoo's superior technological improvements combined with sales success placed them in a position of significant growth of their forklift business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a joint enterprise project to counter act competitive pressures in the US materials handling market. This endeavor radically expanded Daewoo's lift truck sales. Construction was completed in 1984 to facilitate a modern plant which helped establish the company for the manufacture of high end added-value products suited for export. In 1993, the company had a global sales system and started exporting models they had established through in-house expertise, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into international markets.
