

## Pulp Clamp

Pulp Clamps - There is a wide range of lift truck accessories available to be able to make the equipment a lot more useful. A snowplow accessory can be mounted to the front of the forklift. A scoop bucket can be useful whenever the job requires transferring sand, gravel, soil or snow. A double block handler allows the individual operating the forklift to pick up 2 loads and then pile them side-by-side. A lot of of those attachments are considered ideal for light to medium tasks.

One more forklift accessory is the package lift clamp, which could carry and transfer heavier pallets. In addition, pallet crane forks may be used so as to lift and move pallets with an overhead crane. A drum clamp accessory is helpful for moving heavy drums from place to place with out having to make use of a pallet. Forklift mounted hoppers allow materials to be moved and dumped with out having to handle it by hand. These hoppers when the bumper is released are self dumping.

Accessible accessories now consist of accessories which allow a forklift to do the task of a commercial broom or mop. Such specific attachments are often used cleaning parking lots, warehouse flooring, and boat docks. Lift truck mounted platforms are available equipped with twin entry doors and can be attached in order to transport employees from one site to another. The mounted platform accessory is great for reaching places which could be difficult to access, particularly when you've got goods or supplies stored in out of the way areas or really up high.

It is a handy choice to put in lift truck attachments that could instantly transform a forklift truck into a mobile crane unit. This particular equipment is very useful when it comes to moving loads that may be unsteady or difficult. This accessory can either be mounted on the carriage itself, telescopic, or be fixed or forklift mounted.
